FRIDAY, JULY 15, 1898.

Those misguided persons who have been using more or less rhetoric in their efforts to justify the Spanish soldiers in their brutal practice of burning the Cuban hospitals and massacring the patients in them, are now having things brought home to them in a vary practical manner. If there was any doubt as to the character of the men capable of such deeds as have been attributed by the action of the Spanish sharp-shooters, who pick off surgeons and dillerately kill wounded soldiers carried off the field under the protection of the Red Cross. War is bad conagh without accompaniment of savagery. It would be well for our soldiers at the front to realize that they are fighting from to realize that they are fighting uncivilized barbarians, and while nothing can justify them in following the example of the Spanish brutes they should give short shrift to any of the "hospital sharpshooters" that may be captured. It night not be out of place, either, for the authorities of the content of the capture of the should give short shrift to any of the capture of the shrift of the capture of the shrift o either, for the authorities of the United States government to call the attention of some of Spain's European contempo-raries to this latest freak of Spainish

The humane and valorous Ex-Cap-tain General Weyler is having some remarkable experience these days. At one moment there is talk of arresting him and placing him in during with l placing him in durance vite and in the next he is mentioned as a fit member for the ministry that has charge of the affairs of the Spanish government. However the Spanish may decide to dispose of the honorable gentleman, his fate is of small moment to the American people. If he should decide to come to. Cohe and ould decide to come to Cuba and the some of his boasts good, we have doubt that a number of the enthu slastic and straight shooting "Tankee pigs" would be glad to meet him. On the other hand if he stays at home and gets into the ministry, the worst enemy of Spain could not wish that country a greater misfortune.

No sensible man could expect to find No sensible man could expect to find the Cuban soldiers as well equipped and as efficient as Uncle Sam's sol-diers. Yet some of the correspondents who are now in Cuba seem to be much surprised to find that they are not equal to Uncle Sam's regular soldiers. It is not safe, however, to judge soldiers by outward appearances. The hyperceit. outward appearances. The hypercritical gentlemen who are make fun of the Cubans might turn to history and read how the vainglorious General Gates ridiculed Marion's brave little band and then fled himself where each one of the Swamp Fox's men would have died in their tracks. Criticism is all right where it is just, but no man who allows prejudice to blind his judgment or loses sight of circumstances. stances is qualified to pose as a critic.

Since experience is supposed to teach even fool's a certain amount of wisdom it is difficult to understand why the Americans are content to stand around at Santiago and let the Spaniards talk and palayer about surrendering. Negotiations having this end in view have been soing on for a weekly and the standard of the standar been going on for a woek or more. In the meantime yellow fever is gaining a strong foothold in the American camp. There is only one sort of a de-mand the Spaniards seem capable of understanding and that is the demand

Hot Time in the Old Town

is one way of expressing a sense of merriment, but the hot time some house keepers have in sweltering over hot ranges with unsatisfactory fires, with wood, coal, ashes, dirt and annoyance, is it any wonder they look weary and broken down? But with a modern gas range all this trouble disappears. The range will cook anything—it will do it quickly, it will do its work better and more satisfactory than any coal range ever made. It will heat water for the bath or any purpose, and what is more the gas range is the most economical cooker on the market. Gas at \$1.00 per thousand feet is ten cents a hundred. An average family can cook three meals daily with less than 100 feet of gas. Ask those using gas and you will see. Those who have just found out the benefits are most enthuslastic. We have known it so long we wonder why every body don't see it, as we do, but they will soon see it. We are setting ranges every day, and every range set brings along another sounder of its praises.
